# HONEY GINGER TEA

Ginger first appeared in the southern parts of the ancient China. Ginger has a very long history of use in various forms of traditional/alternative medicine. It has been used to help digestion, reduce nausea and help fight the flu and common cold, to name a few. It is also very effective in alleviating symptoms of gastrointestinal distress. Modern scientific research has revealed that ginger possesses numerous therapeutic properties including antioxidant effects, an ability to inhibit the formation of inflammatory compounds, and direct anti-inflammatory effects. Today it is loved by many and is considered one of the best superfoods.
